# FETAL CARDIOLOGY COURSE

**BRISTOL 6<sup>th</sup> October 2023**

# FETAL CARDIOLOGY

## BRISTOL ROYAL HOSPITAL FOR CHILDREN

The fetal echocardiography course is aimed at cardiologists, sonographers, fetal medicine consultants and subspecialty trainees, pediatricians with interest in cardiology and neonatologists.

It will cover a comprehensive and systematic approach to the normal fetal anatomy as well as assessment of cardiac function and rhythm. We will review the normal fetal cardiac anatomy, the 3-vessel view and normal fetal Doppler. There will be several presentations about the diagnosis of major cardiac abnormalities such as septal defects, left and right heart obstructive lesions, transposition of the great arteries and aortic arch abnormalities.

At the end of the course we will have an interactive session with rare and challenging cases and a Quiz.

During the course we will encourage the attendees to interact with the lecturers. The delegates will be given access to electronic course content.

## COURSE CONTENT

- + NORMAL CARDIAC ANATOMY AND SITUS
- + VENTRICULAR SEPTAL DEFECTS
- + HYPOPLASTIC LEFT HEART SYNDROME (HLHS)
- + RIGHT SIDED LESIONS
